P O R T P U B L I C A T I O N S

Port Series Reports, covering the principal harbors of the United States, which were prepared by The Board of Engineers for Rivers and Harbors prior to 1941 to meet the needs of the Government and to supply data for use of importers, exporters, manufacturers, railroads, steamship lines, and others interested in the development of harbors and the establishment of port facilities, were discontinued at the beginning of the war. In their place, abbreviated reports were prepared for the use of war transportation agencies and their scope was confined to the physical features of the port as treated under the chapter headings of port and harbor conditions, fuel and supplies, and port and harbor facilities.

These latter reports, issued as Port and Terminal Facilities Reports, were classified by the War Department as confidential and their distribution was limited.

The restriction on all the volumes is now removed and the reports are available as public information.

Request may be made upon The Board of Engineers for Rivers and Harbors, No. 2 New York Avenue, N. W., Washington 25, D. C., for any of the Port and Terminal Facilities Reports, as well as other publications issued as the Port, Lake, Transportation, and Miscellaneous Series Reports, as enumerated in the attached listing.

OSD review(s) completed.

THE BOARD OF ENGINEERS FOR RIVERS AND HARBORS
STATISTICAL DIVISION
